

PRAKASH MAHESHWARAN

Binghamton, New York | pmaheshwaran@binghamton.edu | linkedin.com/in/prakash-maheshwaran

EDUCATION

Binghamton University, SUNY – M.S. Computer Science (AI) | Expected March 2026 | GPA 3.74/4.00 | Clark Fellowship

Relevant Coursework: Programming Language, Design Patterns, Machine Learning, Introduction to Cloud Computing

VIT ICER, Bangalore – Postgraduate CS (AI Track) | March 2024 | GPA 3.80/4.00

Relevant Coursework: Data Structures and Algorithms, Machine Learning, Artificial Intelligence, Big Data Analytics

CAHCET, Anna University – B.Sc. Information Technology | March 2023 | GPA 3.30/4.00

Relevant Coursework: Object-Oriented Programming, Data Structures, Software Engineering, Mobile Application Development Laboratory

TECHNICAL SKILLS

Languages: Java, Kotlin, Swift, C++, Python

Specialized Skills: Android Development, iOS Development, Mobile UI/UX Design, API Integration, Version Control (Git), Agile Methodologies, Application Testing, Debugging

Technologies: SQL, RESTful Services, JSON, XML, Firebase, GitFlow, CI/CD Basics, Cross-Platform Development Concepts

Other Expertise: Android Studio, Xcode, VS Code, Docker, Kubernetes, Linux, macOS, Windows, JIRA, Confluence

Certifications: Android Basics by Google, iOS Development Essentials, Mobile Application Development Fundamentals

PROFESSIONAL EXPERIENCE

SUNY Research Foundation Assistant | New York, USA | March 2025 – Present

- Assisted senior developers in coding and debugging Android and iOS applications, improving code efficiency by 15%.
- Developed and implemented new UI features for a customer-facing app, resulting in a 10% increase in user engagement.
- Participated in daily stand-ups and sprint reviews, contributing to the successful delivery of features ahead of schedule.

Sun Networks Intern | Vellore, India | Jan 2023 – Mar 2024

- Collaborated on the development of a cross-platform mobile app using Flutter, reducing development time by 20%.
- Wrote unit and integration tests for new app functionalities, achieving 90% code coverage.
- Documented API endpoints and app architecture, facilitating knowledge transfer within the team.

PROJECT EXPERIENCE

TaskMaster: Mobile Productivity App | Chennai, India | Jul 2023 – Feb 2024

- Problem:** Users struggle to manage daily tasks effectively across multiple devices, leading to missed deadlines and decreased productivity.
- Approach:** Developed an Android application using Kotlin, featuring cloud synchronization via Firebase Realtime Database and a clean Material Design UI.
- Features:** Implemented task creation, categorization, due date reminders, and collaboration features for shared task lists.
- Impact:** Achieved over 500 downloads within the first month, with positive user feedback on usability and reliability.

RecipeFinder: Food Discovery App | Chennai, India | Mar 2023 – Jul 2024

- Problem:** Finding diverse and easy-to-follow recipes based on available ingredients can be time-consuming and frustrating.
- Approach:** Built an iOS application using Swift, integrating with a public recipe API to provide a vast database of recipes.
- Features:** Included search functionality by ingredient, cuisine, and dietary restrictions, along with saving favorite recipes.

- Impact: Successfully deployed to the App Store, receiving an average user rating of 4.5 stars for its comprehensive recipe selection and intuitive interface.

CampusConnect: Student Social Platform | New York, USA | May 2023 – Oct 2024

- Problem: University students lack a centralized platform to connect with peers, share academic resources, and stay updated on campus events.
- Approach: Designed and developed a cross-platform mobile application using React Native, enabling real-time communication and event discovery.
- Features: Implemented user profiles, group chats, event calendars, and a forum for Q&A, fostering a stronger campus community.
- Impact: Integrated into campus IT services, resulting in a 30% increase in student participation in campus activities and a more connected student body.

WHITE PAPERS

Optimizing Mobile Application Performance for Enhanced User Experience | Int'l Journal of AI Research | August 2025

- This paper explores advanced techniques for profiling and optimizing mobile app performance, focusing on memory management and CPU usage.
- Recommendations include utilizing platform-specific tools, implementing efficient data structures, and employing asynchronous programming patterns.
- Strategies for reducing app launch times and improving responsiveness are detailed, aiming to maximize user retention and satisfaction.

The Future of Cross-Platform Mobile Development: Trends and Challenges | Preprint Archive | June 2025

- An analysis of emerging trends in cross-platform development frameworks like Flutter and React Native, evaluating their suitability for enterprise solutions.
- Challenges such as achieving native performance, managing platform-specific nuances, and ensuring long-term maintainability are discussed.
- Insights provided for developers and organizations to make informed decisions regarding technology adoption in mobile app strategies.

LEADERSHIP EXPERIENCE

Event Coordinator, Students Guidance Cell | Chennai, India | 28 Months

Organized over 15 student development events, improving engagement and support services for 500+ students.

Volunteer Teacher (Math & CS), U&I | Vellore, India | 12 Months

Taught math and computer science to underprivileged students, improving academic performance for over 30 students.

ACHIEVEMENTS AND AWARDS

- Winner, VIT Chennai Annual Hackathon 2023 - Best Mobile App Solution
- Participant, Anna University Bangalore Mobile App Development Challenge 2022
- Runner-up, 'Code for a Cause' Hackathon, IIT Madras 2023
- Speaker, 'Introduction to Android Development' workshop for freshers, SRM University 2023
